Re: Dolores River - Water Quality Assessment
Water Quality/Flow Data Reports

Dear Tony:

For your information, I enclose two reports which summarize the results of water quality and flow sampling completed in July and October 2002 at the St. Louis tunnel and points along the Dolores River. A copy of SEH, Inc. transmittal letter providing two sets of these reports to the Division, and a single copy to Mark Walker, Lee Hanley and the EPA is also enclosed.

A point of clarification to Chuck Stilwell's December 4 letter transmitting the \$25,000 donation to CDPHE to complete the assessment. It is understood that a revised Statement of Work is required to complete the assessment, notwithstanding Chuck's letter. It is my understanding that Chuck and Susan Robinette will coordinate to finalize that document, and schedule a site visit and meeting with CDPHE and its contractor early in the new year to continue progress on the assessment.

Best wishes for a great Holiday.

Sincerely,

William J. Duffy
